PROJECTS

Comparable

A web app that compares hotel and e-commerce prices across multiple sites

- Utilized web scraping to collect pricing data from popular websites like Goibibo, Amazon, Myntra and 14 more.
- Established real-time communication between the server and client via a socket connection.
- Implemented RabbitMQ messaging queue to allow parallel processing of requests across 3 consumer servers.
- Github - <https://github.com/aashu0148/comparable> [it is my private repo, made it public for sometime]

Grocery Store

An ecommerce store for groceries

- Created e-commerce store for groceries with admin panel, which will help merchants to analyze their sales better.
- Added mobile and email authentication using firebase and other features like profile, wishlist, orders, cart etc.
- Technology used - MERN, CSS, firebase
- Github - <https://github.com/aashu0148/grocery-store>
